GARAGE DOOR MAKE SAFE

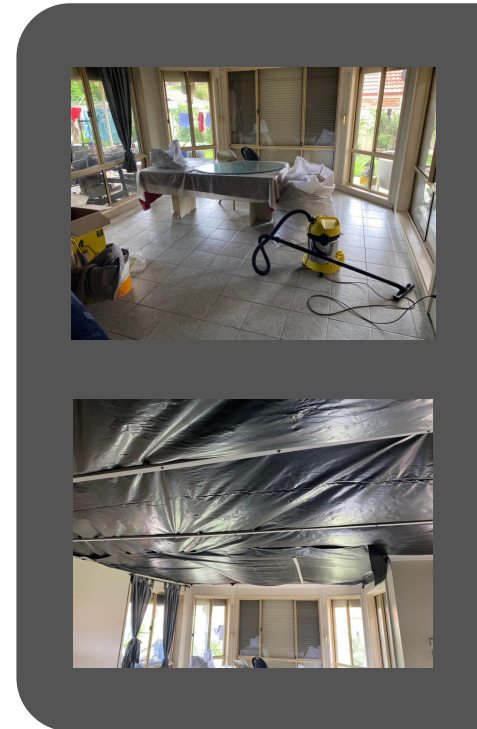

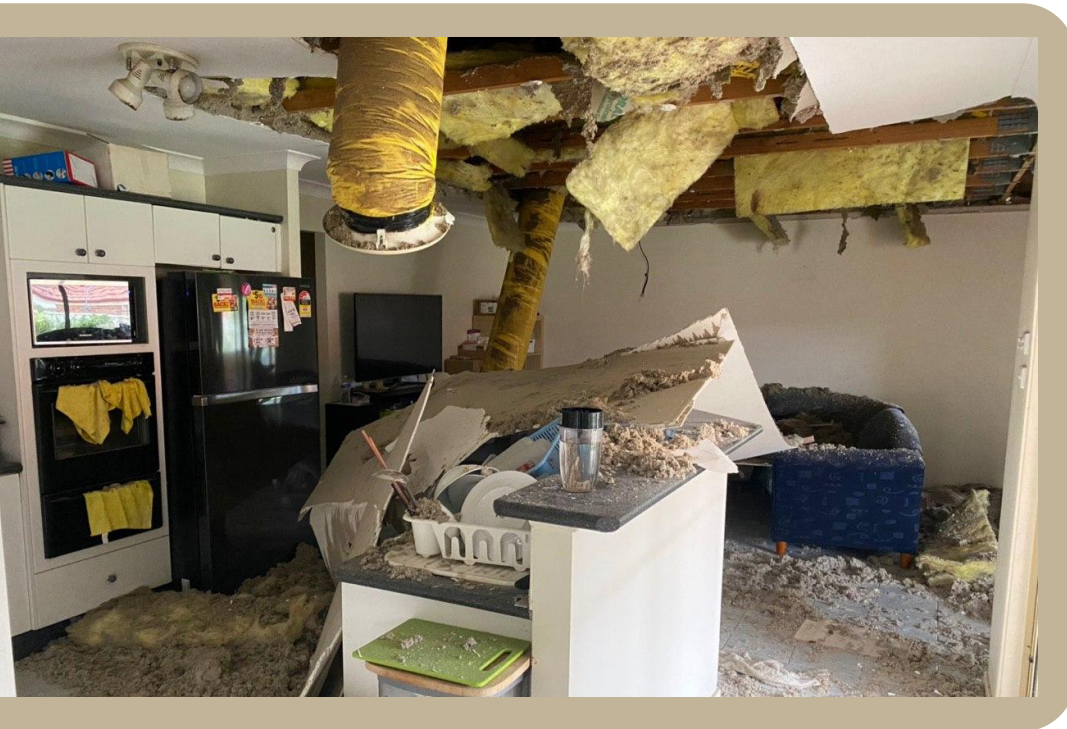

The common cause of garage doors being damaged is due to vehicle impact. Aust Building is equipped and experienced to repair them in due time as we believe that garage doors are important assets to every home. Safety and security are guaranteed in every work that we do.

TEMPORARY FENCING

Property fencing is important as it provides safety, security and privacy to the residents. Vehicle impact and fallen trees during the storm are just some of the causes that make the fence damaged, thus, its purpose is forfeited. In these times, we make sure that we provide the appropriate solution and protection to make the property secured and help reduce the risk of unnecessary incidents.

CEILING MAKE SAFE

Water ingress into the property is one of the main reasons that causes damages to the ceiling as it results to water pooling inside the roof cavity. Ceiling may then be on the verge of collapsing and is deemed unsafe for the residents. We see to it that the damaged parts of the ceiling are removed to avoid accidents and is boarded up afterwards to secure the area temporarily.
